DETAILED ACTION

1. Applicant's election without traverse of Group I (claims 1-23) in Paper No. 9 is acknowledged.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 8, 10, are rejected under 35 U.S.C. 102(b) as being anticipated by Marak. Marak teaches the broadly claimed invention including what can be considered to be a sensor at 20/27, which along with an operator senses the location of a marking located on the workpiece.

3. Claims 1, 4-8, 10-12, and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Erdmann et al. Erdmann teaches the claimed invention including a sensor 14 operatively located on the female die of the press 20.

Note: see Fig. 19 and columns 4 and 5 and claims 10 and 15 of Erdmann et al.

4. Claims 13-20 are allowed.

5. Claims 2 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
